
Hospital beds per 1,000 people 1960 to 2023

Hospital beds include inpatient beds available in public, private, general, and specialized hospitals and rehabilitation centers. In most cases beds for both acute and chronic care are included.

Hospital beds (per 1,000 people) (beds per 1,000 people)

Country or region	1960	2023	1960 to 2023	Absolute Change	Relative Change
Afghanistan	0.17	0.35		+0.18	+105%
Albania	5.10	2.90		-2.20	-43%
Algeria	3.19				
Andorra					
Angola	2.06				
Antigua and Barbuda	7.71	3.42		-4.29	-56%
Argentina	6.35	3.36		-2.99	-47%
Armenia		4.24			
Australia	11.20

How we process data at Our World in Data

All data and visualizations on Our World in Data rely on data sourced from one or several original data providers. Preparing this original data involves several processing steps. Depending on the data, this can include standardizing country names and world region definitions, converting units, calculating derived indicators such as per capita measures, as well as adding or adapting metadata such as the name or the description given to an indicator.

At the link below you can find a detailed description of the structure of our data pipeline, including links to all the code used to prepare data across Our World in Data.
