↘ -23.8% compared to 2024 ↗ 4.3% in 5 years

In 2025, temporary employment contracts sharply but remains at a high level

At the end of 2025, Temporary employment agency activities employ 6,458 people (including 122 permanent staff)[1], i.e. 1,350 fewer workers than in 2024 (-17.3%). The temporary workforce contracted sharply following the completion of major construction projects in 2025. Consequently, the number of hours worked in temporary employment has also declined. It stands at 8.7 million in cumulative terms over the 12 months, or -23.8% year-on-year.

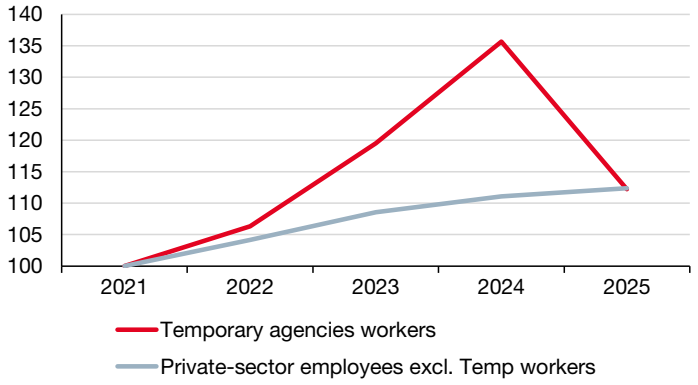

Nevertheless, temporary employment indicators remain at a high level, among the highest ever recorded. Over the past few years, the number of employees and the number of hours worked have both risen very steadily, reaching a peak in 2024. Between 2021 and 2025, the number of employees in Temporary employment agency activities has grown by 12.2%, i.e. over 700 additional temporary workers. Simultaneously, the number of hours worked increased by more than 350,000 since 2021 (+4.3%). Over the same period, the private sector as a whole, excluding temporary employment, saw an increase in its workforce of 12.4%. Thus, despite the decline in activity between 2024 and 2025, the temporary workforce grew as much as the non-temporary workforce over five years.

1. Number of employees and cumulative hours worked in temporary employment in 2024 and 2025

	2024	2025	Var 24/25
Temporary agency workers	7,808	6,458	-17.3%
including permanent staff	*130*	*122*	*-6.2%*
Hours worked in temporary empl.	11,459,672	8,736,426	-23.8%

2. Change in the number of employees in temporary employment and in the private sector (index base 100 in 2021)

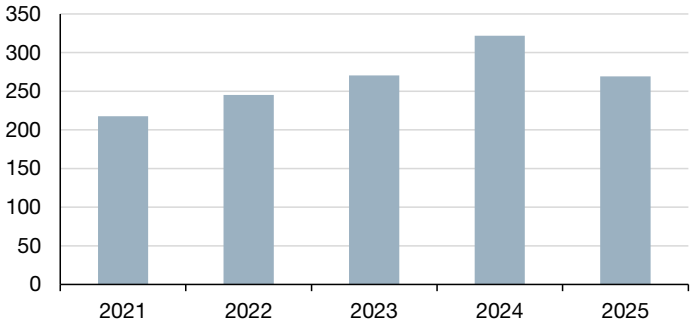

Reading: The number of temporary workers increased by 12.2% between 2021 and 2025 (index 112.2 in 2025); this number rose by 12.4% over the same period in the private sector, excluding temporary work (112.4).

Sources: Caisses sociales de Monaco, Monaco Statistics

Temporary employment revenue is approaching €270 million

3. Change in the revenue of temporary employment

Unit: million euros

Sources: Department of Tax Services, Monaco Statistics

The revenue generated by temporary work agencies listed in the Trade and Industry Register of Monaco reaches €269.0 million for 2025. This indicator is down on 2024 (-16.4%), as is the employed workforce, and is close to the 2023 figure.

The temporary employment revenue has grown by 23.7% over the past five years, an increase of €51.6 million over the period.

- 5,559 men and 898 women make up the temporary workforce in 2025, which is 86.1% male (in total private employment, men account for 61.1% of the staff).
- Temporary workers are, on average, younger than the overall private-sector workforce (40.6 years compared with 42.5 years), and almost all of them (98.4%) live outside the Principality.
- Portuguese nationals are over-represented in temporary employment (21.0% of the workforce compared with 6.8% overall). Conversely, the French are under-represented (42.6% versus over 60%).

[1] This section considers employees and hours worked in the subclass *7820G: Temporary employment agency activities* of the new "NAF 2025" classification registered at the end of the year under consideration, regardless of the sector in which the temporary work assignments are carried out. The 122 permanent staff of the temporary work agencies in the Principality are also included in this population, although they do not have temporary status.

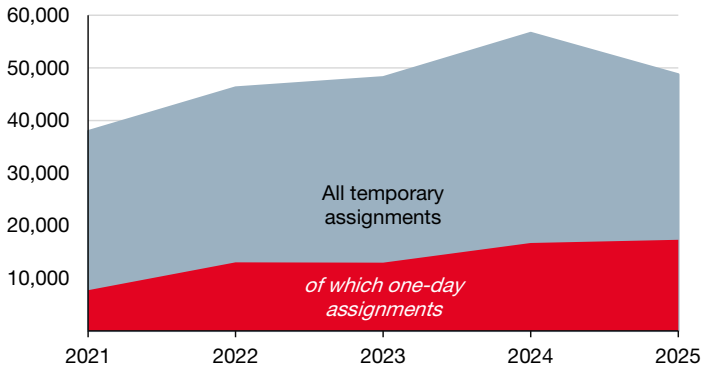

The number of temporary assignments has returned to its 2023 level

4. Number of assignments and days worked in temporary employment in 2024 and 2025

	2024	2025	Var 24/25
Number of temporary assignments	56,654	48,752	-13.9%
Days worked in temporary empl.	2,580,411	1,669,683	-35.3%

Sources: Temporary work agencies, Monaco Statistics

5. Change in the number of temporary assignments and one-day temporary assignments

Sources: Temporary work agencies, Monaco Statistics

48,752 temporary assignments were carried out in 2025, representing nearly 1.7 million days over the year. These figures are down by 13.9% and 35.3% respectively, reflecting the slowdown in activity compared with 2024.

In 2025, the number of assignments returns to a level comparable to that of 2023. More than 10,000 additional contracts were registered over the past five years, corresponding to a 28.4% rise over the 2021-2025 period. Meanwhile, the number and proportion of very short-term contracts within the overall number of assignments has continued to rise. In 2025, more than a third (35.5%, i.e. over 17,000) of temporary assignments lasted a single day (or 6.1 percentage points higher than in 2024, equivalent to 625 additional assignments). This type of contract is traditionally found in Food and beverage service activities: in 2025, nearly six out of ten one-day assignments fall within this category.

The construction sector accounts for 40.3% of temporary assignments and 69.6% of days worked

In 2025, four out of ten temporary assignments are carried out on behalf of building firms. These contracts represent almost 70% of the total days worked in temporary employment over the year. Construction is thus the Monegasque major economic sector (MES) making the most use of temporary work.

It is followed by Accomomdation and food service activities, which accounts for nearly a quarter of the assignments, but only 2.3% of days. This low proportion is due to the predominance of short-term contracts and 'extra' assignments in food service activities which, incidentally, account for almost all of this MES's activity.

11.5% of 2025 assignments are undertaken by Administrative and support service activities, with a share of days reaching 6.2% of the total.

Companies operating in Other service activities, Financial and insurance activities, Real estate activities and IT, telecommunications and media are those that make the least use of temporary staff.

The decline in the number of days worked in temporary employment compared with 2024 is observed across all MESs.

6. Breakdown of the temporary assignments and days worked by sector of the user company in 2025

	Share of assignments	Share of days
Construction	40.3%	69.6%
of which Construction of residential and non-residential buildings	*25.3%*	*44.0%*
Accommodation and food service activities	24.6%	2.3%
of which Food and beverage service act.	*22.4%*	*1.6%*
Administrative and support service activities	11.5%	6.2%
of which Services to buildings and landscape activities	*5.1%*	*2.1%*
of which Security and investigation activities	*4.3%*	*3.2%*
Retail trade	8.5%	3.6%
Industrial, productive and craft activities	4.3%	7.0%
Human health, education and administration	1.9%	1.5%
Arts, sports and recreation	1.9%	0.4%
Transportation and storage	1.6%	1.2%
Professional, scientific and technical activities	1.5%	3.3%
Wholesale trade	1.3%	1.0%
Other service activities	0.8%	1.2%
Financial and insurance activities	0.8%	0.6%
Real estate activities	0.5%	0.7%
IT, telecommunications and media	0.4%	1.4%
Total	**100%**	**100%**

Note: New MESs since the entry into force of the NAF 2025 on 1 January 2026.

Sources: The analyses presented in this Focus come from separate sources:

- statistics on the salaried population and hours worked are based on December data supplied by the Caisses sociales de Monaco;
- statistics relating to assignments are based on data collected by Monaco Statistics from the temporary work agencies operating in Monaco in 2025;
- the revenue mentioned comes from the Department of Tax Services.

Assignments: All assignments with an end date in the year under consideration are taken into account, regardless of the number of hours worked.
