SINGAPORE ASSET MANAGEMENT SURVEY 2025

SINGAPORE – A FULL-SERVICE ASSET MANAGEMENT AND FUNDS CENTRE IN ASIA PACIFIC

MAS Monetary Authority of Singapore

Singapore's AUM grew by 10% to reach S$6.7 trillion (US$5.2 trillion[1]) on the back of robust market performance and net inflows.

As a full-service asset management and funds centre, Singapore has 1,320 asset managers with investment teams managing client assets and investments out of Singapore and serves as a key gateway for access to the region's growth opportunities. 76% of AUM is sourced from outside Singapore and 88% of total AUM is invested globally.

of funds invested outside Singapore

[1] Exchange rate of USD/SGD 1.2841 on 31 December 2025

[2] Alternative AUM grew 0.4% as the entry of several new managers more than offset the downsizing of one large manager. Excluding the downsizing, Singapore's Alternatives AUM growth was 9%.

Discretionary AUM accounted for more than half of total AUM in 2025, reflecting the substance, expertise and value-adding nature of investment professionals based here, and Singapore's ongoing attractiveness as a leading centre in APAC for investment and capital deployment.

Singapore's net inflows grew by 29% year-on-year in 2025. This momentum is driven by a rise in new mandates acquired and managed from Singapore.

Chart 3: Assets under Management

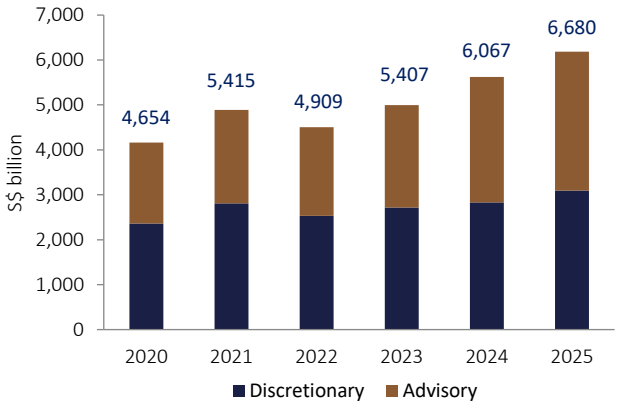

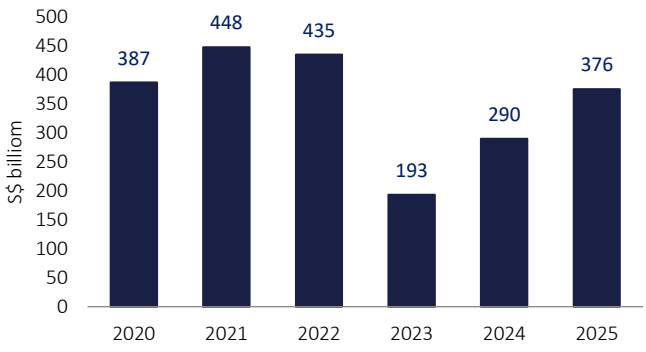

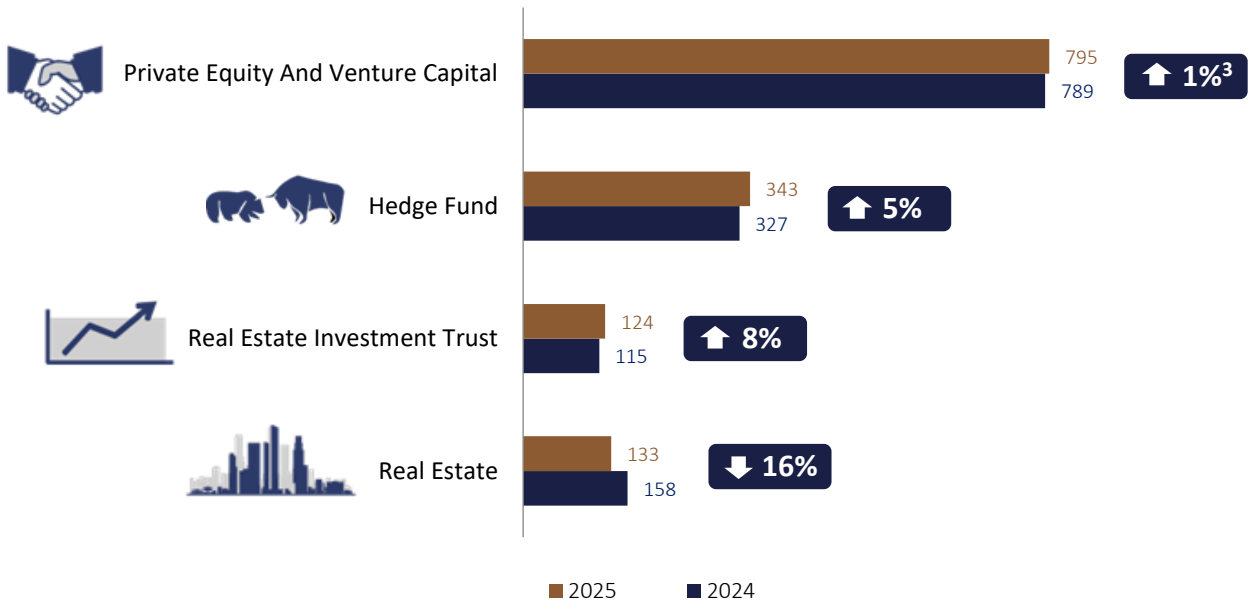

Chart 4: Net AUM Inflows

Alternative AUM grew 0.4% in 2025, led by growth in hedge fund and REITs. AUM growth for Private Equity and Venture Capital moderated in 2025 as the entry of several new managers more than offset the downsizing of one large manager. Real estate AUM dipped further amidst compressed valuations and weaker investors sentiment.

Data as of 31 December 2025

As a global-Asia gateway, regional and global asset managers are set up in Singapore with investment capabilities and expertise to intermediate capital and investment opportunities. The asset managers and investment community are supported by a strong network of legal and tax advisors and service providers for fund administration and governance, and a suite of Singapore corporate and legal structures including the Variable Capital Company for investment management and fund domiciliation to be co-located.

In 2025, MAS introduced the Equity Market Development Programme (EQDP) to strengthen the local asset management and research ecosystem. Under this programme, MAS invests in fund strategies that invest fully or substantially in Singapore public equities managed by asset managers that demonstrate a strong track record and proven investment capabilities. These asset managers have also committed to growing their investment and research capabilities in Singapore. The Exchange Traded Fund (ETF) Industry Taskforce co-led by MAS and the Singapore Exchange also worked with the asset management industry to support the growth of the ETF market and offer more choices to investors. During the year, MAS also continued with our Private Market Programme to anchor marquee managers in private equity, private credit and infrastructure in Singapore.

As Singapore deepens its capital markets and broadens its suite of investment offerings, MAS remains committed to working in close partnership with industry to strengthen Singapore's value proposition as a premier hub for asset and wealth managers — building the infrastructure, talent, and regulatory environment needed to capture the opportunities that lie ahead in 2026 and beyond.

About the Report

The Monetary Authority of Singapore (MAS) releases an annual update of the Singapore asset management industry for the calendar year ending 31 December. Data presented in this report is collected from MAS' annual survey of the asset management industry.

This report provides key data on Singapore's asset management industry for the calendar year ending 31 December 2025 and highlights key areas of development. Financial institutions surveyed include Banks, Finance and Treasury Centres, Capital Markets Services licensees (including REIT managers), Financial Advisers, Insurance Companies, and Exempt Entities, but excludes direct investments by government-related entities. 1,346 respondents participated in the survey. The methodology adjusts for double counting among reporting entities that may have reported the same AUM mandates (e.g. a fund of funds manager investing with a Singapore-based asset manager).
