Dubai Population Prediction

Since the start of the year 2024 to mid-October 2024, Dubai's population has seen an increase of over 134,000 people, says a report by global ratings agency S&P.

With the growing economy and the thriving job market, people find Dubai the right place to settle in.

Expo 2020 and Dubai's emergence as a major international-quality tourism destination have brought more attention to the place, further fueling the influx of people.

By 2030, the population of Dubai is expected to hit a whopping 4.6 million.

And by 2040, the population is predicted to reach 5.8 million.

Dubai Overview

Dubai is one of the seven emirates that make up the UAE.

It shares borders with Abu Dhabi in the south, Sharjah in the northeast, and the Sultanate of Oman in the southeast.

The emirate spans an area of 1,588 sq mi (4,110 km2) and has a population density of 110,000/km2.

The national language of Dubai is Arabic although English is also widely spoken and used in business, tourism, education, and daily communication.

The national currency of Dubai is UAE Dirham (AED).

From a desert trading port to a global metropolis, Dubai has seen rapid transformation.

The city has grown as a centre for regional and international trade since the 20th century.

Dubai’s economy mainly relies on tourism, trade, real estate and finance services.

Dubai Demographics in 2025

Dubai’s demographics reflect a diverse and dynamic society.

In the following sections, we explore the key aspects that define Dubai’s population structure.

Gender Split of Dubai Population

Note: *This image is based on Dubai's population of 3.84 million in January 2025.*

As of June 2025, Dubai's population data shows a clear difference between the number of men and women living in the city.

There are about **2.70 million males**, making up **68.60%** of the total population.

On the other hand, the number of **females is 1.24 million**, which is **31.40%**.

This gap exists because many male workers move to Dubai alone for jobs, especially in construction, transport, and similar sectors.

These workers usually don't bring their families with them.

However, when looking at families and permanent households, the number of males and females is nearly equal.

Gender	Population	**Population (%)**
Male	2.70 Million	68.60%
Female	1.24 Million	31.40%

Dubai Population by Age

Note: *This image is based on Dubai's population of 3.84 million in January 2025.*

Since Dubai is a commercial hub, the majority of the population belongs to the prime working age group, i.e. individuals in the age group of 25 – 54.

14.79% of the population of Dubai belongs to the 0-14 age group. This is the second largest age group, totalling to 0.58 million people.

Compared to the 0-14 age group, the 15-24 years age group has a slightly smaller population, accounting to 11.16% or 0.44 million.

The highest percentage population is constituted by the 25-54 age group. They make up 68.97% of the population, approximately 2.72 million – nearly three-quarters of the total population of Dubai.

The population percentage significantly drops when it comes to the older age groups.

The 55-64 years age group constitutes only 3.93%, ie, 0.15 million people.

And the 65+ years age group accounts for an even smaller share, totalling to 1.15%, around 0.05 million.

Age Group	Population	Population (%)
0-14 years	0.58 Million	14.79%
15-24 years	0.44 Million	11.16%
25-54 years	2.72 Million	68.97%
55-64 years	0.15 Million	3.93%
65 years and above	0.05 Million	1.15%

Dubai Population by Gender

To take a deeper look into the Dubai population by age, we calculated the population by gender for the different age groups.

In all age groups, the population of men is higher than that of women, with the 25-54 age group having the highest population percentage and 65+ age group having the lowest population percentage.

In the 0-14 age group, 7.48% (0.29 million) was constituted by men while 7.31% (0.28 million) were women.

This near equality in the men-women percentage drops for the other age groups.

Looking at the 15-24 age group, we can see a sharp decline in the women population.

While the men’s population constitutes 7.28% (0.28 million), the women’s population accounts for only 3.88% (0.15 million).

The 25-54 years age group follows a similar trend with 50.44% (1.94 million) being men and only 18.53% (0.71 million) being women.

Coming to the older age groups, the 55-64 year age group also has a higher men population, accounting to 2.73% (0.10 million).

The women population for the 55-64 group is 1.20% (0.05 million).

For the 65 years and above group, the population split by gender is nearly balanced with 0.67% (0.03 million) being men and 0.48% (0.02 million) being women.

Age Group	Men	Women
0-14 years	0.29 Million	0.28 Million
15-24 years	0.28 Million	0.15 Million
25-54 years	1.94 Million	0.71 Million
55-64 years	0.10 Million	0.05 Million
65 years and above	0.03 Million	0.02 Million

Emirati vs Expatriate Population in Dubai

Dubai has one of the highest expatriate populations in the world.

The reason for the huge expatriate population is

- Economic growth and job opportunities which attract professionals from all over the world
- The safety and high quality of life
- The strategic location with well-connected airports
- Investor and business friendly policies encouraging long-

term residencies

- The large scale infrastructure and development projects creating ongoing employment opportunities

The expatriate residents make up 92.02% of the population of Dubai, which corresponds to 3.53 million.

The Emirati population, on the other hand, accounts to 7.98%, approximately 0.31 million people.

Nationality	Population	**Population (%)**
Emirati	0.31 Million	7.98%
Expatriate	3.53 Million	92.02%

Population Distribution in Dubai by Planning

Sector

The Emirate of Dubai is divided into 9 sectors based on the administrative boundaries. Sectors 1-6 are primarily urban areas and include the majority of the populated areas.

Sectors 7-9 are considered more rural. Each sector is further divided into smaller communities or subdistricts.

- **Sector 1** – Northern coastal area of Dubai on the north bank of Dubai Creek, corresponding to the district Deira

- **Sector 2** – Northern area of Dubai on the border with the Emirate of Sharjah, including including Muhaisnah, Mirdif, Al Nahda and Al Qusais

- **Sector 3** – Along the central coastal area of Dubai, and on the southern bank of Dubai Creek, including Bur Dubai, Jumeirah, and their immediate outlands

- **Sector 4** – Central-northern area of Dubai, including Ras Al Khor, Nad Al Hammar and Al Warqaa

- **Sector 5** – Southern coastal area of Dubai, from Marsa Dubai in the north, to the border with the Emirate of Abu Dhabi in the south, including Jebel Ali

- **Sector 6** – Central area of the Emirate of Dubai including the vast industrial area of Ras Al Khor, the residential areas of Nad Al Sheba and Wadi Al Safa, with the Al Warsan area containing the residential complex of Dubai International City

- **Sector 7** – North-eastern part of the Emirate of Dubai, bordered to the north and east by the Emirate of Sharjah

- **Sector 8** – Central-eastern area of the Emirate of Dubai, sharing border to the east with the Emirate of Sharjah and

to the south with the Emirate of Abu Dhabi

- **Sector 9** – central and southern area of the Emirate of Dubai, bordered to the south and west by the Emirate of Abu Dhabi

Sector 3 has the highest population concentration representing 36.35% of the total population, totaling 1.40 million residents.

Sector 2 and Sector 5 have the second and third highest population respectively, comprising 18.4% (0.71 million) and 13.96% (0.54 million) of the total population.

Sector 1 stands at a close fourth position, with 13.87% (0.53 million people).

Sector 6 is the next highest populated sector, with 12.34% of the population, that is 0.47 million people.

Sectors 4, 7, 8 and 9 are comparatively less populated.

Sector 7 is the least populated sector, with only 0.47% of the total population.

Sector 9 is also sparsely populated, accounting to 0.70% (0.03 million).

Sector 8 and Sector 4 have slightly higher populations, comprising 1.15% (0.04 million) and 2.76% (0.11 million) respectively.

Sector	Percentage	Population (in Million)
Sector 1	13.87%	0.53 M
Sector 2	18.40%	0.71 M
Sector 3	36.35%	1.40 M
Sector 4	2.76%	0.11 M
Sector 5	13.96%	0.54 M
Sector 6	12.34%	0.47 M
Sector 7	0.47%	0.02 M
Sector 8	1.15%	0.04 M
Sector 9	0.70%	0.03 M

Dubai Population by Year

Over the past five decades, Dubai has experienced remarkable population growth, transforming from a modest trading port into a bustling global metropolis.

In 1975, the city's population was 183187 (0.18 million).

In 2025, the population stands at 3,951,029 (3.95 million), marking a significant increase.

Looking at the 50 years in between, the population has consistently been on the rise.

In 1980, the population rose to 276,301 (0.28 million) and by 1985, it was 370,788 (0.37 million).

By 1995, the population crossed half million, amounting to 689,420 (0.69 million).

During the period, the growth was driven by the discovery of

oil, infrastructural development, and the rise of trade and tourism.

From then, the population growth saw a sharper rise, more than doubling from 862,387 in 2000 to 1.91 million in 2010.

It was a period of rapid urban expansion.

Projects like Burj Khalifa and Palm Jumeirah were taking shape, attracting global attention.

Dubai was also establishing free zones at this time, boosting foreign investment and expatriate population.

The population rose from 1.91 million in 2010 to 3.41 million in 2020, marking a nearly 80% increase in a decade and crossing 3 million.

During this time, Dubai had begun to diversify its economy, focusing on sectors like tourism, finance, and real estate.

In 2023, Dubai housed 3,655,000 (3.66 million people).

It rose to 3,790,000 (3.79 million) in 2024 and stands at 3,951,029 (3.95 million) at present.

The introduction of long term residency programs and remote

work policies make Dubai a preferred destination for expatriates, continuing to attract them to the country.

Year	Population
2025	3.95 Million
2024	3.79 Million
2023	3.66 Million
2020	3.41 Million
2015	2.45 Million
2010	1.91 Million
2005	1.32 Million
2000	0.86 Million
1995	0.69 Million

1985	0.37 Million
1980	0.28 Million
1975	0.18 Million

The Future of Dubai's Population Growth

Dubai's population growth has been driven by rapid urbanization, economic expansion, and an influx of expatriates from around the world.

A reflection of its ambitious vision, the city is transforming into an international hub.

With a strong foundation in infrastructure, innovation, and investment-friendly policies, Dubai is poised for continued growth in the coming years.

As Dubai continues to grow, strategic planning and adaptability will be key to ensuring that its population growth contributes positively to the growth of the UAE.
