Location: Dubai is situated on the eastern coast of the Arabian Peninsula to the south-west of the Arabian Gulf, with a coast of about 72 km in length.

The Dubai Addressing system, launched in 2016, now it covers the Dubai emirate across 14 districts.

Area: Dubai is the UAE's second-largest emirate, after Abu Dhabi, and covers an area of 4,114 square kilometers, equivalent to 5% of the total area of the UAE. Known as the capital of UAE's economy, Dubai shares borders with Abu Dhabi in the south, Sharjah in the northeast, and the Sultanate of Oman in the southeast.

Population: The emirate of Dubai has the highest population density in the UAE. According to the 2019 census conducted by the Dubai Statistics Center, the population of Dubai is approximately 3,295,334.

For a daily update on the population, you can check the population clock on the website of Dubai Statistics Center.

Topography: Dubai lies directly within the Arabian Desert. However, its topography is significantly different from that of the southern portion of the UAE in that much of the city's landscape is highlighted by sandy desert patterns, while gravel deserts dominate much of the southern region of the country.

Climate: Located in the northern desert belt of the southwest of Asia, here are the features of Dubai's tropical desert climate:

- Temperature: Summers are extremely hot and humid with an average high around 41.8 °C and overnight lows around 29.7 °C. Most days are sunny throughout the year. Winters are warm and short with an average high of 23 °C and overnight lows of 14 °C.

Average rainfall: Precipitation has been increasing in the last few decades with accumulated rain reaching 87.3 mm per year. Most of the rainfall occurs during winter (January 15 mm – February 31 mm – March 18.9 mm).

Humidity: Due to the Arabian Gulf's shallow waters, humidity is high in Dubai with annual average of 59% to reach its peak in January and February, registering 65%.

Wind: Most of the year, a low-pressure area develops over Dubai, forcing northern and northwestern winds.
